🎓 Education

Bachelor of Technology- Computer Science with specialization in Artificial Intelligence & Machine Learning	11/2020 – 05/2024
CMR College of Engineering and Technology ⧉	Hyderabad, India
CGPA : 7.51	

Intermediate - Mathematics, Physics, Chemistry	06/2018 – 03/2020
Narayana Junior College ⧉	Hyderabad, India
Percentage : 96.5	

📁 Projects

To-Do List — 04/2023 – 05/2023
- Engineered a adaptable to-do list application with JavaScript and local storage, enhancing user productivity through seamless task management, including 3 features such as task addition, updating, and deletion.
- Demonstrated advanced JavaScript proficiency in local storage management, DOM manipulation, and fostering user engagement.

E-commerce Website — 02/2024 – 03/2024
- Utilized JavaScript to dynamically retrieve and exhibit product data from the fakeStoreAPI, enriching the website with an extensive array of authentic product listings.
- Implemented JavaScript functionalities for 3 to 4 features, including product addition, shopping cart management, and wishlist interaction.
- Optimized website aesthetics and user navigation with efficient Bootstrap styling and layout.

Food App — 02/2024 – 03/2024
- Crafted a food application using React, Redux, and Axios, integrating restaurant data from a Swiggy mock API and delivering it seamlessly on the homepage.
- Enhanced user experience with 4 features, including restaurant search by name, location filtering, and real-time cart updates for added convenience.
- Improved usability with a loading shimmer effect during data retrieval and ensured smooth navigation across different application sections.

Shipment Details ⧉ — 07/2024 – 07/2024
- Developed a React-based frontend application for a sustainable transport service, enhancing user interaction and experience.
- Implemented a dashboard component featuring a calendar viewer and a data grid for displaying shipment details, improving operational efficiency.
- Integrated file upload functionality using Axios, enabling users to upload documents directly through the UI.

- Handled asynchronous data fetching from a backend API to populate the dashboard with real-time shipment data.

MovieSearchSite ⬈   02/2024 – 03/2024

- Developed a responsive movie search site utilizing React and Bootstrap, hosted on Vercel for accessibility (https://movie-search-site.vercel.app/).
- Empower users to search for movies and display 3 details, such as title, release year, and concise overview.

🧠 Skills

Cpp	Java
Python	Javascript
React	Machine Learning
Mongo DB	Redux
Version Control	HTML & CSS
Bootstrap	SQL
Material UI	

💼 Experience

Frontend Developer Intern   05/2024 – present
Scutoid Technologies   Hyderabad, India

- I crafted responsive and intuitive user interfaces to streamline asset tracking and management.
- My responsibilities included building reusable components, optimizing performance, and ensuring seamless integration with backend services.
- I implemented dynamic functionalities and enhanced user experience by incorporating interactive elements.

📑 Certificates

- Frontend Fundamentals - Meta
- Frontend developer - Innomatics
- Programming with Javascript ⬈

✏️ Extra Curricular

- **Organized an event Tech Quiz in Azura, 2022 a Techfest in CMRCET, Hyderabad**
- **Solved overall 150+ problems in various platforms.**
- **Organized a College Table Tennis Tournament at CMRCET, Hyderabad**
